

Microsoft® Project Conference 2012: A special event for the worldwide Microsoft Project Community

Get more out of your Project 2010 investment! Attended by a worldwide audience of project professionals, business and technical decision makers, and the Microsoft Project team, this unique point-in-time event is your opportunity to learn, network and get more out of your Project 2010 investment!

By attending the conference, you'll have access to:

- Training and certification on Microsoft Project Professional 2010 and Microsoft Project Server 2010
- Customer evidence presented firsthand by satisfied users
- In market and applied best practices

Project 2010 Computer-Based and Instructor-Led Training

Don't miss out on these great opportunities for Project 2010 training:

- Project Professional 2010 (Managing Projects 70-178)
- Project Server 2010 (Configuring 70-177) computer-based training with your Project Conference 2012 registration (Hurry: limited seats are available for this hands-on training session.)
- Instructor-led training sessions

Certification Testing

Certification testing will be available for Microsoft Project 2010 (Managing Projects 70-178) and Microsoft Project Server 2010 (Configuring 70-177). Due to limited seating, you must sign up separately to reserve your space for testing. We reserve seating based on a first-come, first-served basis. After registering for the conference, please submit your interest in testing to projconf@microsoft.com. Hurry to take advantage of this great opportunity.

Earn Professional Credentials

You can earn up to 32 PDUs while you attend the conference.

Session Breakout Tracks

With over 170 abstracts submitted, Microsoft Project Conference 2012 will cover a variety of topics in-depth across three tracks: Business Value & Insights, Product Sessions, and Deployment, Administration & Developer. Content highlights to date:

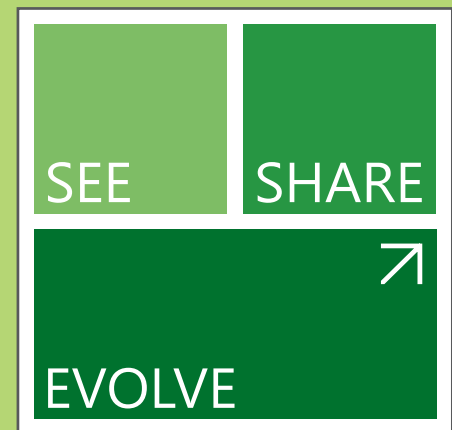

- 15 customer-led sessions (representing 6 verticals) where customers share personal success stories using Microsoft Project and Portfolio Management (PPM).
- Project desktop best practices for scheduling, program management, Earned Value, and more.
- Project Server best practices for Demand Management, Portfolio Analysis, Resource Management, Time Management, Business Intelligence, and more.
- Key solutions overviews and case studies for Application Lifecycle Management, Innovation Process Management, Product Lifecycle Management, Dynamics AX integration, ERP integration, and more.
- Technical best practices for IT Professionals and Developers.

A full list of session titles and abstracts will be available in mid-December on the official conference website at www.msprojectconference.com.
